**DETAILED ACTION**

***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-5 are rejected under 35 U.S.C. 102(b) as being anticipated by Son et al (4539122).

Son teaches a drilling fluid additive comprising ferrous gluconate (see column 1, lines 3-35 and the abstract). Applicants discovery of a new property of an old composition cannot distinguish over the prior art (In re Tomlinsin 150 USPQ 623).

3. Claims 1-16 are rejected under 35 U.S.C. 102(b) as being anticipated by Son (4526693).

Son teaches a drilling fluid which comprises a cross-linkable polymer and ferrous gluconate (see column 2, lines 54-57 and Examples I – II). The ferrous gluconate reacts with hydrogen sulfide in the formation (column 3, lines 7-100). The teaching of a pH of about 9 by Son (see claim 5, and column 3, lines 13-15), anticipates the “greater than 9” and “about 10” of the present invention (see In re Daveney 88 USPQ 97). ). Applicants discovery of a new property of an old composition, such as listed in claims 1-5, 7, 8, and 13-16 cannot distinguish over the prior art (In re Tomlinsin 150 USPQ 623).
